SUMMARY

I'm an experienced, **Web Application Developer** with a proven track record of delivering to clients and employers, excellent creative solutions to their problems, needs and requirements using modern practices and technologies. Experienced in all phases of web development from concept to completion, with a strong work ethic and pleasant team oriented attitude. I like my code D.R.Y., clean, and thoughtfully organized into reusable OOP systems. Seeking a fulltime position in the Los Angeles area or a remote position.

TECHNICAL SKILLS

Languages: JavaScript, JQuery, HTML5, CSS3, SCSS, PHP, Less, Bootstrap
Databases: MySQL, PostgreSQL, Microsoft Access
Software: Dreamweaver, Photoshop, Illustrator, Fireworks, In-Design, Premier, Maya, Microsoft Office
Platforms: Windows, Linux, OSX, WAMP, LAMP, LAPP
Additional: OOP, Git, JSON, Jira, Zend, WordPress, npm, Gulp

PROFESSIONAL EXPERIENCE

Inverselogic, Inc.   **Web Application Developer**   **6/2018 – 2/2020**

Full Stack Web Developer working on improvements to company's e-commerce platform as well as creating and editing client -commerce sites. Using Linux, PHP, Zend, Javascript, JQuery, SCSS and HTML5.

- Updated the company's e-commerce platform to be ADA compliant as well as several client sites.
- Added many new features to their ecommerce platform including Wish Lists, Gift Certificates, Credit Card Management, Mailchimp's ecommerce API integration and Skuvault's API integration.
- Created a custom API for searching movie titles for a media licensing client.

Self as Creative Pro-Source   **Freelance Web Developer**   **6/2017 – 6/2018**

Did short term contract work for the following companies while seeking a full time position.

Steel Toe Labs, Inc.
- Used OOP PHP to create class to convert portions of XML into JSON.

Robert Half Technologies
- Created the UI and functionality of a vertical slideshow and installed it into a custom WordPress template using HTML5, JavaScript, JQuery, and CSS3. Also animated the intro slide using CSS3 animation.

MGA Entertainment
- Developed the glamgoo.com website using a preexisting in house custom content management application using Hand coded MySQL, JavaScript, Less, Bootstrap, Gulp, npm and some AngularJS.

Remedly, Inc.   **Web Application Developer**   **4/2014 – 6/2017**

Part of a team developing the web application Remedly.com, a membership site allowing plastic surgeons to have online pre and post procedure consultations, and manage many other aspects of their practice.

- Spearheaded the design of systems and coding practices to take existing procedural code to structured systems with a clean separation of style, structure and functionality using OOP PHP, OOP JavaScript, JQuery, PostgreSQL, and Git on a Linux system.
- Created an email campaign system with customizable templates and email list management, including managing bounced emails using AWS messaging service.
- Created a social media campaign system, allowing Doctors to create and schedule posts to Facebook, Twitter and LinkedIn.
- Created a HTML5 canvas application that allows Doctors to draw over imported scans of patients as part of a procedure note system.
- Created an analytics system using complex PostgreSQL queries, Google Charts and PDF reports, for the doctor to track many aspects of his practice, including inventory, revenue, and patient activity.

Self as Creative Pro-Source   Freelance Web Developer   2/2013 – 4/2014

Designed, developed, tested and deployed the following websites.

AquaElliptica.com
Created for an inventors Kickstarter campaign using WordPress.
- Customized a WordPress theme from Woo Themes to match my design.
- Created custom graphics in Illustrator and Photoshop and edited a video in Premiere Pro.

CreativeProSource.com
A single page responsive portfolio site.
- Used OOP JavaScript, JQuery, CSS3, HTML5, and DOM manipulation to make the single page site interactive and responsive.
- Illustrator, Fireworks, Dreamweaver, Photoshop and Premiere Pro were used in the designing and creation of graphics.

Brain Zoo Studios   3D Character Animator   12/2010 – 2/2013
3D Character Animator working on multiple direct to video and computer game projects using Maya.

Self as Creative Pro-Source   Freelance Web Developer   2/2008 – 12/2010

Freelance Web Developer
Designed, developed, tested and deployed the following websites.

Raven-Reviews.com
A review site.
- Hand coded a dynamic, total custom WordPress theme from the ground up, using WordPress, XHTML, CSS, JavaScript, PHP, and MySQL.
- Illustrator, and Photoshop were used in the design and creation of graphics.

Other Experiences

- **3D character animator** for commercials, feature films, and video games.
- **Co designed UI and created graphics** for museum kiosks and computer based training programs for major corporations and the **Smithsonian Institute**.
- **Illustrator** and **graphic designer**.
